About Us

Having work done in your home is never enjoyable, but we've made it as simple and easy to manage as possible with a fully up-front service to save you time, money and lots of aggravation. Let us take control of your project leaving you to sit back and enjoy the finished product. Our service backs up a fantastic range of products, all fully guaranteed and energy certified, made to the highest standard from one of Europe's largest uPVC windows, doors and conservatory manufacturers.

We install energy rated high performance windows, with A+, A, B & C ratings available.

For every installation that qualifies for an energy rating, the correct energy performance certificate to give you peace of mind.

We issue a 10 year guarantee, energy performance certificate, and maintenance guide with every order, so you can be sure you've got a genuine product.

Casement windows

Our uPVC windows are practical, low maintenance and because they are uPVC you can be sure they will keep looking good for years to come!

The most popular replacement window option, casement windows can be used for various installations as the simple design makes them suited to almost every property type whether it's a domestic home or new-build application.

We supply uPVC casements in a range of sizes and configurations depending on your home. Options vary per system but our uPVC windows can be foiled or spray coloured using the RAL range.

Available in a variety of arrangements and sculptured designs, our astragal bars are suited for a use in a variety of different window types and styles.

With our choice of window frames you not only get a slim, stylish and attractive window frame, but also a product that incorporates all the benefits of modern uPVC.

Your uPVC frames will never need painting and will not warp, rot or discolour over time.

Tilt and Turn and Bay windows

Tilt and turn windows are an ideal replacement window for multi-storey buildings and window installations in difficult to reach places such as above a conservatory. This window can be tilted into a room to allow for easy cleaning of the glass from the inside.

The bay window is common in older homes and we can supply uPVC windows in a range of styles and sizes to meet your requirements.

French and Vertical sliding windows

French windows are a classic twist on the casement style and are ideal for customers living in older properties as the traditional appearance fits in with homes of this style.

Both sashes on our uPVC French windows open fully to almost 90° to give a clear opening, proving natural ventilation to a room and one sash carries the central mullion for an unobscured view to outside.

Sliding Sash uPVC Windows

Our sliding sash windows perfectly emulate the traditional style and operation of period sliding sash windows with one major difference: they're made of truly convincing uPVC in timber effect. Simulating the diagonal profile joins seen in traditional woodworked windows, our sliding sash windows combine beautiful, traditional aesthetics with modern thermal performance.

With a wide range of woodgrain foils to choose from, along with a variety of traditional pulleys and ropes, sliding sash windows can be easily tailored to any property. Perfect for heritage homes, or homes in conservation areas. Our sliding sash windows are an excellent, easy to maintain and a cost effective alternative to timber windows.

Door Handles and Window Security

Windows

Multi point central locking shoot-bolt locks are fitted as standard on all our windows to ensure only the highest level of security. Our window handles are high security too and are auto locking PVD finished.

High quality, durable corner keeps offer peace of mind.

Easy-clean and egress hinges are fitted as standard on all side openings

Doors

Our handles are high security auto locking PVD finished.

French, Patio & Bifolding Doors

French doors have a classic design that suits most types of property. We install Liniar, Rehau, Halo and Eurocell uPVC inward or outward opening French doors.

Install as an entranceway to a garden/patio area or as part of a conservatory to give it a traditional feel. Frames can be sprayed in any RAL colour but to replicate the look of a timber French door frames, they can also be foiled with a wood grain effect.

Features and benefits of our French doors

- French doors fitted with hook and roller locks
- Both doors have handles and full locking security as standard
- Open outward doors fitted with restrictors

If space is a concern our attractive, slim-line uPVC sliding patio doors open up a room without the door intruding into the property, letting light in and giving great views to outside.

Our patio doors are manufactured using energy efficient Liniar or Halo profile for improved thermal insulation.

Features and benefits of our sliding patio doors

- 2/3/4 pane options available for any size installation
- High performance locking system
- Gold, chrome and white hardware available
- Excellent weathering performance

Bi-fold doors open up a room in an elegant and efficient way.

All doors are folded in a space saving manner and conveniently slide to the side, making use of the aperture width and opening the room to the outside.

We can install both Liniar and Aspect uPVC bi-folding doors, uPVC doors shown. We also provide Smart aluminium and WarmCore bifolding doors.

Stratus Lantern Roofs

Thermal break technology ensures that Stratus lantern roofs are warm in the winter and cool in the summer.

Combining sleek, contemporary looks with truly outstanding performance.

Available in 3 design models, Stratus comes in a choice of 2 hard-wearing exterior powder coated finishes, with a white interior.

Conservatories

Our conservatories guarantee high quality and performance of the highest standards, while allowing each single building to 'speak the local language', adapting the style of the conservatory to its surroundings.

We can design bespoke conservatories to your exact requirement. Glazing options include Polycarbonate or Solar Control, Tinted and Self Cleaning Glass, and all our conservatories are manufactured to British Board of Agreement (BBA) standards.

We can install high quality Global and K2 polycarbonate or glass conservatory roofs. These roofs use a range of energy efficient solutions to achieve maximum performance.

These well-engineered roofs have been designed to be easy to specify, easy to fabricate, easy to fit and easy to maintain. That's what makes the Global and K2 roof the ideal choice for conservatory projects worldwide.

Celsius Solid Roofs

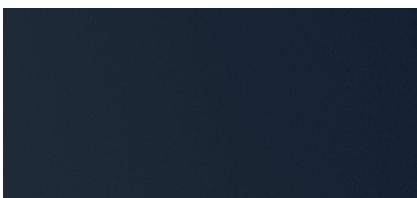

The superior thermal performance of Celsius Solid Roof creates a high quality living space that ensures warmth and comfort, helping to insulate the home, and saving on heating bills.

Key benefits of the system are:

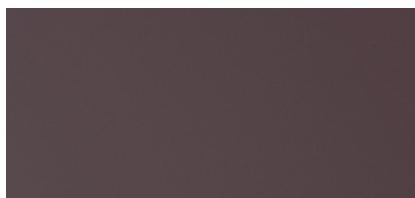

- Celsius Solid Roof achieves a U-value of 0.18 W/m²K for compliance in England and Wales and a U-value of 0.15 W/m²K for compliance in Scotland is achieved by fitting insulated plasterboard
- Celsius Solid Roof is constructed using highly insulated Structural Insulated Panels, avoiding the use of an aluminium framework to create a truly warm solid roof construction
- 100% recycled polypropylene Envirotiles are available in a choice of appealing colours - Black, Dark Brown or Terracotta
- 10 year guarantee on tiles
- Large roof vents are available to allow in maximum light
